PROFESSIONAL SUMMARY

- IT and Cloud Support professional with 4+ years of experience supporting enterprise identity, endpoint, and infrastructure environments across Azure AD (Entra ID), Okta, GCP IAM, and Microsoft 365.
- Strong background in access management, endpoint security, network monitoring, and incident resolution within fast-paced production environments.
- Experienced in collaborating with infrastructure and security teams, with a growing focus on cloud security and security operations.

SKILLS

Operating Systems: Windows, macOS, Kali Linux

Networking: Switches, Routers, Firewalls, VPN (Cisco AnyConnect, Azure VPN, Cloudflare), VoIP, TCP/IP, DNS, DHCP, SMTP

Cloud Platforms: Microsoft Azure, AWS, Oracle Cloud

Microsoft Technologies: Windows Server 2019/2022, Exchange, Microsoft 365 (Office 365), RAS, RDS, DNS, DHCP, Microsoft Intune, Entra ID (Azure AD)

Virtualization & Compute: VMware ESXi, VMware Workstation, Hyper-V, VirtualBox

Endpoint & Device Management: Microsoft Intune, JAMF Pro

IT Service Management & Ticketing: ServiceNow, Salesforce, Remedy, Jira, Freshservice, Zendesk

Vulnerability Management: Qualys, Nessus, OpenVAS

Security Tools & Monitoring: Microsoft Defender, Microsoft Sentinel, Splunk, Elasticsearch (ELK), Wireshark, Tcpdump, Nmap, OSINT, VirusTotal, Burp Suite.

Scripting & Databases: Python, PowerShell, SQL (MySQL, PostgreSQL)

Frameworks & Standards: MITRE ATT&CK, NIST Cybersecurity Framework (CSF), ISO/IEC 27001, CIS Controls, ITIL

EXPERIENCE

Cloud Support Analyst | September 2025 – December 2025 | Pearl Technologies (Client: Charger Logistics), Brampton (On-site)

- Administered enterprise identity and access across Active Directory, Azure AD (Entra ID), Okta, and GCP IAM, resolving authentication and permission issues impacting daily business operations.
- Supported core internal applications including Microsoft 365, Box, and Sage (Citrix), ensuring reliable access for on-site and remote users.
- Deployed and configured Linux (Ubuntu) and Windows Server 2019 on HP ProLiant DL380p and VMware Edge 3400 servers to support infrastructure deployment and refresh initiatives.
- Monitored network health using WhatsUp Gold and coordinated with ISPs and internal network teams during outages, restoring services in a timely manner.
- Delivered on-site and remote support via BeyondTrust and validated business continuity by testing 5G router failover solutions (Cradlepoint, Netgear, Teltonika).

IT Operations Analyst | November 2024 – June 2025 (Contract) | InsightGlobal, Toronto | Client: Mattr, Toronto (On-site)

- Delivered L2 desktop and systems support across Windows and macOS environments, diagnosing and resolving network, access, and hardware/software issues in on-site and hybrid setups.
- Coordinated IT onboarding and offboarding by provisioning access, configuring devices, and guiding users through core tools, ensuring secure and timely enablement.
- Managed identity and device platforms including Azure AD (Entra ID), Azure PIM, OneDrive, and JAMF Pro, enforcing secure identity lifecycle and device compliance.
- Administered Meraki-based MDF/IDF infrastructure (switches, access points, firewalls) and maintained accurate asset and IP documentation using Device42.
- Configured and supported Microsoft Teams and Zoom Rooms using Poly Studio and TC8 touch panels, enabling reliable hybrid and executive meetings.
- Collaborated with security teams to monitor Microsoft Defender alerts, remediate malware, support NodeZero internal penetration tests, and enhance Splunk dashboards for endpoint and infrastructure visibility.

IT Support Specialist | January 2024 – August 2024 | Infosenseglobal, Gandhinagar (Hybrid)

- Administered Active Directory for account provisioning, password resets, MFA enforcement, and access controls, maintaining compliance with security standards.

- Supported VMware ESXi environments and managed backup and recovery operations using Veeam to ensure data protection and system availability.
- Deployed and managed software packages using Microsoft Intune, streamlining distribution across 200+ devices and ensuring full device compliance.
- Resolved VPN access issues via Cisco AnyConnect and troubleshooted Microsoft 365 applications, reducing remote support response time by 40%.

Technical Support Specialist | June 2021 - September 2023 | Rogers Communications/Shaw Communications, Toronto (Remote)

- Resolved complex technical issues across mobile devices, business-grade networking equipment, wireless routers, VoIP phones, and Meraki access points, improving customer uptime by 25–30%.
- Troubleshooted and restored network, internet, email, digital phone, and cable TV services, achieving 90–95% first-call resolution while meeting SLA targets.
- Supported business and residential service lines, contributing to improved customer satisfaction and operational efficiency.
- Documented troubleshooting workflows and knowledge articles, reducing repeat issues by 20% and improving team efficiency.

Information Technology Support Analyst | December 2020 – June 2021 | Kelly Services, Etobicoke | Client: Lifelabs (On-site)

- Installed, configured, and maintained hardware, software, networks, printers, and scanners, supporting 100+ devices across clinical and corporate environments.
- Delivered onsite technical support for Windows 10, Windows Server 2012/2016, Exchange Server, and Microsoft 365, achieving a 95% first-contact resolution rate.
- Managed endpoints and user/group administration using Intune and Active Directory, maintaining 100% policy compliance across 150+ devices.
- Evaluated new technologies prior to deployment and maintained accurate IT asset inventory documentation.

PROJECTS

SIEM Implementation in Azure Cloud | [GitHub](#)

- Deployed Microsoft Sentinel in Azure, configured log ingestion, and developed custom KQL analytics rules to correlate security events and generate actionable alerts.
- Improved security visibility and enabled proactive monitoring aligned with real-world SOC workflows.

Password Management System in AWS | [GitHub](#)

- Deployed and configured Passbolt, a self-hosted password management solution, in AWS using HTTPS encryption and role-based access controls.
- Established a secure, centralized credential management solution aligned with access control and data protection best practices.

Cybersecurity Risk Assessment & IAM Simulation (PwC & Tata – Forage) | [Googledrive](#), [GoogleDrive](#)

- Performed IAM simulations, conducted cybersecurity risk assessments, reviewed network segmentation and firewall configurations, and documented findings using industry frameworks.
- Delivered security recommendations aligned with enterprise best practices, strengthening IAM and risk management understanding.

EDUCATION

Centennial College

Post Graduate Certificate, Cybersecurity

Canadore college

Post Graduate Certificate, Information Technology Project Management

Gujarat Technological University GTU

Bachelor of Engineering, Information Technology

September 2019 - April 2020

Scarborough, Ontario, Canada

January 2019 – August 2019

Scarborough, Ontario, Canada

July 2014 - May 2018

Ahmedabad, Gujarat, India

CERTIFICATIONS

CompTIA: Security+

Microsoft: Azure Administrator AZ-104, Azure Fundamentals AZ-900, Microsoft Certified: Security, Compliance and Identity Fundamentals SC-900, Microsoft Certified: Security Operations Analyst SC-200.

TryHackMe: Cyber Security 101, SOC Level 1, SOC Level 2, Cyber Defense
